

High risk obstetrical helicopter makes special stop at hospital

Written by Holyoke Enterprise

□□ One of the helicopters used for high risk obstetrical patients made a brief stop in Holyoke Thursday, Aug. 5. The helicopter is part of North Colorado Med Evac out of Greeley. The normal staff on board includes a pilot, critical care RN and a labor and delivery RN. The four-person team visited the hospital to inform staff about the new program that began in July. The stop was one of many in northeastern Colorado last week.□□
