

## Letter to the editor Food for thought offered

Written by Helen Einspahr

---

Dear Editor,

I do cardiovascular therapy and as I look out the east window, I see a wasted area. A therapy swimming pool for those who need the water therapy would help a lot of us and even small children such as little Blye.

My friend used a pool in Kearney, Neb. when she had double knee surgery and she said it was great and the best thing she ever used.

Several people agree with me and it would help me in the areas of my problems, my hips shoulder and legs.

It's just food for thought and I think it would be a good investment.
