

Rain adds to hard times

Written by Holyoke Enterprise

Dear Editor,

☐ Seems this year has been a very exciting year with all the rain, wind, hot, sunny days now and then, and then we get more rain, which is good for the dry ground but also very difficult to drive on those country roads, getting stuck on muddy roads.

☐ Hope the farmers can get their field work done; our country depends on the farmers, ranchers, hog farms, poultry, etc. for our survival as well as all our military men and women who are protecting our country.

☐ We are all facing very difficult times, trying to make ends meet especially with high cost of fuels, electricity, medical expenses, insurances, health and medicare issues. "I wonder if the stimulus packet was a good incentive for all American citizens?"

☐ And talking about those efficient cars in the year 2012 that are safe, healthy and run real cheap!

☐ I suppose the cars won't be cheap. I will never be able to afford one. I hope my legs won't give up on me because I will need to peddle my bike by that time.

☐ God bless everyone and give us patience and strength and keep us all in good health.

Sincerely yours,

Eufracia Secrist
