

Mini Park receives treatment

Written by Holyoke Enterprise

A crew with Hayward Baker Geotechnical Construction was in Holyoke Thursday-Friday, May 17-18 drilling holes and mud jacking the foundation at the Mini Park with the hopes of beefing it up to help save the brick wall and make the area a little safer. After drilling holes, the crew pumped in a mixture of concrete and slurry which lifts the base.

Holyoke City Council approved the work during the April 17 regular meeting.
